

TA577 Investigation Report

Vincent Lindsay

Findings

- Time: 2023-12-15 16:01:58 UTC
- Host: 10.12.15.101
- IOC Domains: jinjadiocese[.]com, keeb[.]com, baumbachers[.]com, ionister[.]com
- IOC IP's: 68[.]66[.]226[.]89, 66.42.96.18, 45.77.85.150, 207.246.75.243
- IOC Filename: GURVU.zip
- File Hash- SHA256:
f24888da47bae0149ab5c0d887d32fc155cb42ac8138d22699ae12ce1dca6bd1

Investigation Summary

On 2023-12-15 at 16:01:58 UTC, the host 10.12.15.101 was seen querying an unusual domain name jinjadiocese[.]com. This access into the domain led to the download of an archived file: GURVU.zip which began at 16:02:02 UTC. Following this, the likely execution of the file led to multiple DNS queries beginning at 16:05:18 UTC. Based on our investigation, these DNS requests have been reported in the wild as malicious and related to PikaBot. With evidence of these DNS requests, we believe with high confidence that the host 10.12.15.101 is infected with PikaBot malware. Based on the PCAP provided, we cannot say with confidence if the activity is still ongoing.

Who, What, When, Where, Why, How

- **Who:** Host: 10.12.15.101
- **What:** Downloaded ZIP file: GURVU.zip .
- **When:** 2023-12-15 16:01:58 UTC, based on the PCAP given, we cannot determine if the activity is still on going.
- **Where:** The activity took place on a computer with the IP address 10.12.15.101.
- **Why:** The intentions of the user on the host 10.10.15.101 are indeterminate.
- **How:** The user navigated to the domain and initiated a download, either intentionally or unintentionally, which resulted in the GURVU.zip file being downloaded, and the file's contents were likely executed based on the DNS requests.

Recommendations

- Immediately isolate this host and consider a forensic investigation to determine the impact of this incident. Otherwise, reimage this machine to ensure complete removal of additional artifacts that may be left behind.
- Execute a query to search for the domains, IP addresses, and file hash of the zip file to check if any other hosts are associated with these indicators of compromise (IOCs). If you find additional hosts linked to these IOCs, isolate them immediately as well.
- Although both IPs and domains are relatively easy to change for an attacker, consider placing these IOC IPs and domains in a blocklist to prevent additional compromise.
