Investigation Summary

On 09/24/2026 at 10:52 UTC the user Dwight Schrute received a suspicious email from a proton-based domain attempting to impersonate Michael Scott. The email contained typical social engineering factors such as urgency, and in this case the subject pertained to a change in the user Dwight's compensation. The email also contained a PDF that contained a link to haveibeenpwned[.]com The user received the email, but did not click onto the email, nor accessed any attachments. The user Dwight did not receive any additional emails from the whoami295@proton[.]me email address. Based on the evidence given in Microsoft Defender for Office 365, this activity is classified as anomalous, but benign.

Who, What, When, Where, Why, & How

WHO – User account Dwight Schrute

WHAT – Received a suspicious email with the subject of “Salary Change” containing a file named: Salary Change.pdf

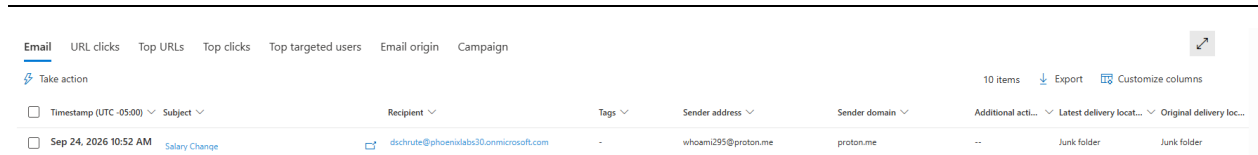

WHEN: Based on the Defender for Office 365's Explorer page, the user received the email at 10:52 UTC.

WHERE: The activity took place on the account user Dwight Schrute. The sending email's IP address was identified as 109[.]224[.]244[.]29.

WHY: The intent behind the email is not exact, but based on the evidence, the email sent to the user was a failed impersonation attempt.

HOW: Since the user did not click onto the email, the attacker's intentions were not achieved.

Recommendations

- 1) Run a query searching for the domain, file name, and subject line “Salary Change”. If additional user accounts were found to receive the email. Instruct the users to report the email as phishing and delete the email.
- 3) Although domains are relatively easy to change for an attacker, consider placing these domains in a blocklist to prevent them from being sent to the users.
